

# End-User License Agreement (EULA)

## 1. General Provisions

**1.1. Addressee and Subject Matter:** This End-User License Agreement (hereinafter: Agreement or EULA) is concluded between **AMC Europe Kft.** (registered seat: Csiri utca 13 H-2045 Törökbálint HUNGARY, tax number: HU10854790) (hereinafter: **Developer**) and the downloader/user of the Software (hereinafter: **User**) and governs the terms of use for the CoolMotion software freely downloadable from the webshop.

**1.2. Acceptance:** By downloading, installing, copying, or otherwise using the Software in any way, the User unconditionally accepts all terms and conditions of this Agreement.

## 2. Grant of License

**2.1. Type of License:** Developer hereby grants the User a non-exclusive, non-transferable, **royalty-free license** to use the Software.

**2.2. Purpose:** The Software may be used exclusively for the development and editing of motion control projects and for the creation of associated *Runtime* packages.

**2.3. User Group:** The Software may be used free of charge for both commercial (business) and non-commercial (private individual) purposes.

## 3. Ownership and Restrictions

**3.1. Ownership:** The Software, all copies thereof, its source code, documentation, and all related intellectual property **shall always remain the exclusive property of Developer.** The license to use the Software does not constitute a transfer of ownership.

**3.2. Prohibition of Resale and Distribution:** The User **is not authorized** to copy, modify, resell, distribute, loan, rent, or otherwise make the Software available to any third party (either free of charge or for a fee).

**3.3. Runtime Packages:** The *Runtime* packages generated from motion control projects created with the Software are the property of the User, and the User may freely use them for their own purposes, at their own risk and responsibility.

## 4. Disclaimer of Warranty and Limitation of Liability

**4.1. DISCLAIMER OF WARRANTY:** The Software is provided "**AS IS**," without warranty of any kind, either express or implied. Developer **provides no warranty** regarding the Software's error-free operation, its availability, its compatibility with third-party software, or that the Software will meet the User's expectations or specific purposes.

**4.2. LIMITATION OF LIABILITY:** Developer **excludes its liability** for all direct, indirect, incidental, or consequential damages (including, but not limited to, loss of data, loss of profit, business damage, or material damage) arising from the use or inability to use the Software, or due to a defect contained within the Software. **The User uses the Software at their own risk.**

**4.3. Support:** Developer **does not provide** any form of **personal support, help desk, or training** for the Software. The User may obtain the necessary information exclusively from the available **freemotioncontrolsoftware.com** website, **YouTube channel, forums**, or other **online or printed** documents.

## **5. Third-Party and Open-Source Software Components**

The Software incorporates or relies on certain software components provided under open-source licenses. The use of the Software is subject to the terms and conditions of these third-party licenses, which the User hereby acknowledges and accepts.

### **5.1. Qt Framework**

- The Software utilizes components of the **Qt Framework** licensed under the **GNU Lesser General Public License (LGPL)** and/or the **GNU General Public License (GPL)**.
- **LGPL/GPL Obligations:** Where LGPL or GPL licensed Qt components are used, the User accepts the obligations arising from these licenses, including, but not limited to, the right to modify the respective Qt components and, in the case of GPL, the requirement to share the application source code in specific scenarios.
- **Source Code Access (Qt):** The corresponding source code for the Qt components used in the Software can be obtained by downloading them from the official Qt repositories ([www.qt.io](http://www.qt.io)).

### **5.2. GNU Compiler Tools (MGW and Linux Cross-Compiler)**

- The Software includes the **MGW compiler** (based on MinGW/GCC) for compiling the CoolMotion project for Windows, and a separate **GNU Cross-Compiler** for generating Linux-targeted code.
- Both the compilers and their associated runtime libraries (e.g., libstdc++) are licensed under the **GNU General Public License (GPL)** with the **"Runtime Library Exception."**
- **Runtime Exception:** This exception allows the distribution of the object code or executable form of the Software, and the *Runtime* packages it generates, without subjecting the User's proprietary code to the full copyleft requirements of the GPL. This is because the output of a compiler is generally not considered a derivative work of the compiler itself.
- **Source Code Access (Compilers):** The corresponding source code for the GNU Compiler tools and their runtime libraries can be obtained by downloading them from the official GNU repositories ([www.gnu.org](http://www.gnu.org)).

### **5.3. Distribution of License Texts (Mandatory Compliance)**

- The User acknowledges that the license terms for the open-source components (GNU General Public License v3 and GNU Lesser General Public License v3) require the distribution of the full license texts along with the Software.
- Developer shall include the complete, original English-language text of the GNU GPL v3 and GNU LGPL v3 licenses in the Software's installation package (e.g., in accompanying .txt files).
- By using and potentially redistributing the Runtime package (which may contain dynamically linked LGPL libraries), the User agrees to the obligation to make the license texts available to the final end-user, in accordance with the terms of the respective GNU licenses.

**5.4. No Additional Warranty:** The Licensor provides **no warranty** for the third-party and open-source components. The warranty disclaimers and limitations of liability stated in Section 4 apply equally to the use of these open-source components.

## 6. Modification and Termination of Terms

**6.1. Right to Modify:** Developer reserves the right to freely change or modify the terms of this Agreement **at any time without prior notice**. The modified terms become effective upon their publication on the webshop's website.

**6.2. Termination:** This license automatically terminates if the User breaches any term of the Agreement. Upon termination, the User must immediately delete the Software and all copies thereof.
