

The Company

Welcome to AMC Europe Ltd., European headquarters of ADVANCED Motion Controls, a world leader in servo drive solutions and precision motion controls, headquartered in California, USA.

[ADVANCED Motion Controls](#) [1] was founded in 1987 to provide high quality servo amplifiers and drives for the rapidly expanding automated machinery demands in many industries. AMC's focus is working with customers to develop and produce motion control amplifiers and drives capable of delivering from 20 W up to 48 kW peak.

[ADVANCED Motion Controls](#) [1] has numerous standard products available but also provides custom products for OEMs with specific requirements or special option adaptations that meet their needs. Designs include both analog and digital technology covering a broad range of solutions. The newly introduced [Digiflex](#) [2]® family offers multiple configuration capabilities, networking solutions, and provisions for optional software libraries to reduce programming time.

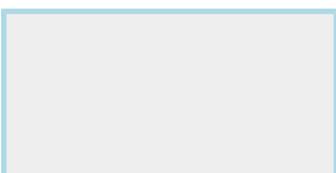

[AMC Europe Ltd.](#) [3] serves and supports the European, Middle-Eastern and African areas whereas AMC in the USA serves and supports North & South America, Asia and Oceania. Collectively, we provide customers: sales, technical support and repairs for all of AMC's products. A major distinction between AMC and the competition is when we become an integral part for the engineering for our customers. The [development of specialized amplifiers](#) [4] and drives is emphasizing by technical assistance on both hardware and software areas. This provides the most optimized motion control solution by increasing performance and reducing costs.

As well as providing high-performance servo amplifiers and drives, AMC offers [power supplies](#) [4], [servomotors](#) [5], [accessories](#) [4], and [complete system solution consultation](#) [4]. Many of [AMC drives](#) [6] (i.e., [Digiflex](#) [2]®) are fully adaptive, configurable via RS232, RS485, CANopen or SynQNet interfaces. Easy adjustment to mechanical components is also accomplished in merely minutes. Features such as these allow our products to be applicable as quick replacement parts or as primary consideration for existing machine redesigns. Customers can anticipate short delivery lead times with the most common types delivered from our European stock location.

Our product offering can be found on the following pages. Navigation is made simple by using the menu on the left-hand side. If you have any questions regarding AMC or our products, do not hesitate to [contact us](#) [7] by: letter, e-mail, telephone, FAX or in person. We will make every effort to accommodate you.

[8]

AMC's Europe Ltd. is located in Hungary on "Mirror-hill" (Tükörhegy) in Törökbálint. Our location is near the M1 and M7 highways in the suburban region of Budapest.

Arriving by car from the West, take exit "Törökbálint-Budakeszi" from M1 highway, or take exit "Törökbálint" from M7 highway, then follow the route of Bajcsy Zsilinszky st. - Bartók Béla st. - Kápolna st. - Raktárvárosi st.;

Coming from Southeast, take "Diósd" exit from M0 highway then follow the route of Diósd st. - Raktárvárosi st.;

Driving from downtown Budapest, take exit "Budaörs-nyugat" of M1-M7 highway, then turn on left, drive alongside "Depo", and take Raktárvárosi st.

[3]

AMC Europe Ltd. provides customers with technical support by our highly qualified engineers. Support includes application assistance in our well-equipped electric laboratories. All the persons of our technical staff are trained motion control engineers with technical backgrounds including: kinematics, computers, research and development of servo drives, and have experiences in applied motion control systems over many fields of the industries. Application engineers work in assistance with our customers in selecting the most suitable AMC products that fit their applications. Service engineers' staff provide repairing services for all AMC products. Customer Service receives inquiries and delivers product- and pricing informations in 10 hours a day. Phone calls we accept both in English and Hungarian languages.
